Before the **Network Connection** when selecting a print server, you need to take into account the type of physical... user interface, setup and management programs.

Print Server Setup-Up. Be sure that you can **adjust** the print server **polling** rate, which sets how often the print server asks the host server for print jobs. By **reducing** the **polling** time, you **reduce** the lag time between when a job is submitted and when it gets serviced. However, it can also **increase** the number of poll requests and the number of requests that your server can handle...
